Medical Transcription & Terminology: An Integrated Approach, 2E

Synopsis

This unique book is designed to help learners enter the health care field as medical transcriptionists as quickly and easily as possible. The unique, class-tested format helps students build their skills as they work through five different types of medical reports - first previewing the medical terminology and then transcribing the dictated medical report. Learning tools such as Challenge Reports, Punctuation References, and Logs to help learners monitor their progress accommodate individual learning styles. Specialty reports, recent regulations, information relevant to document preparation and certification procedures, and helpful Web links are also included.

Customer Reviews

Lois Burns is and Associate Professor at New York City Technical College of the City University of New York. She is also the Educational Consultant and Evaluator for Empire State College, School of Labor Studies. In addition, Ms. Burns is a member of the American Association for Medical Transcription. Florence Maloney is a Professor at Kingsborough Community College of the City University of New York.

Book was in great condition.

Excellent book. I got it in good condition and very cheap unlike the book stores.

This book is a good reference book if you are already transcribing. It is useless as a teaching tool without the audio tapes. The audio tapes are expensive for 6 - 90 minute tapes and must be ordered from Delmar Publishers. Unless you are enrolled in a class and have the tapes available from your school I would not recommend this book for beginners.

The description of this book sounds good. It will make you think that you are going to learn from this book. In reality, you must have the audio tapes or the book is useless. I can't find the tapes to purchase.
