# NLN's Certified Nurse Educator Review: The Official National League For Nursing Guide

## Synopsis

Written by expert researchers, educators, and professionals who collaboratively design standards and national certification exams for professional nurses, the CNE Review Book is the definitive guide for faculty pursuing the CNE credential. Based on the revised 2012 practice analysis, this book is an essential text for aspiring certified nurse educators and all nurse educators across the academic spectrum. Each of the book's chapters addresses one of the eight competencies required for the practice of academic nursing education. Special features include:

- Sample test questions developed by the Certification Test Development Committee of the NLN Certification Commission
- Extensive bibliography of the most current literature addressing each competency
- How-to applications of content to the educator's practice.

## Customer Reviews

Linda Caputi, EdD, RN, CNE, ANEF, is the editor of the "Innovation Center," a column in the National League for Nursing's journal *Nursing Education Perspectives*. She is a certified nurse educator and a fellow in the NLN's Academy of Nursing Education. She is professor emerita, College of DuPage, and most currently taught in an online master's in nursing education program. She has won six awards for teaching excellence from Sigma Theta Tau and is included in three different years in the *Who's Who Among America's Teachers*. The second edition of her book *Teaching Nursing: The Art and Science* was selected as the winner of the 2010 Top Teaching Tools Award in the print category from the *Journal of Nursing*

Education. She has recently completed a three-year term on the NLN's Board of Governors. She is also president of Linda Caputi, Inc., a nursing education consulting company, and has worked with hundreds of nursing programs over the past 20 years on topics related to revising curriculum, transforming clinical education, test-item writing, and test construction, using an evidence-based model for NCLEX® success, assisting with accreditation, and numerous other nursing education topics.

This book is the key to exam success. Perfect description of the test and many helpful hints. The review questions were very helpful.

This book is one of the the NLN's recommendation to study for the CNE exam certification. You cannot go wrong in adding this book to your study list! The book covers all topics necessary.

I passed the CNE exam! I agree with others that there is not ONE book that will prepare you, but instead you will need to study from multiple sources. I primarily used Caputi's book, along with Billing's and Halstead's book. I also attended a live prep course and listened to Billing's webinar (multiple times). Give yourself plenty of time to prepare.

I haven't taken the test yet - but the chapter questions are annoying - the right answer fails to mention which example its referring to - and worse for me anyway - the rationales do not consistently address the wrong answers - why is the answer scholarship of application versus integration etc. I think I'm fussy - I'm not thrilled with the Mometrix book either. I have written content for one of these big review companies and I understand that different people develop different sections - but continuity is definitely necessary as far as I'm concerned. I will definitely be checking other resources, and I will update my review after I complete the exam.

Read the book entirely through twice. Well organized, and makes sense to study a book written by the authors of the CNE exam, and thankfully I passed.

Fairly concise book to prep for exam but also very useful in guiding newer educator of important principles to follow in practice.

I definitely wouldn't recommend this as your only study source. There is no comprehensive test and

some of the end of chapter questions (in a CNE book of all places) are pretty bad (D. all of the above. Really??) The book is pretty small and the font could have been bigger. Pages of block text. The EBP and research highlights were useful. For such great authors, I was disappointed in the overall text. I bought this and borrowed the Wittman-Price and found that one more useful/easy to use. The Mometrix test bank wasn't useful for me, but it might be for you. Spring for the online NLN practice tests to focus your studying. Maybe get your department to buy them both, or share with a peer. Good luck. I passed today and it is a difficult exam. Can't wait for the ordered honor cord to arrive for the regalia!! (See the NLN site....)

The best prep book for CNE!
