Sefer Yetzilah: The Book Of Creation

Synopsis

Rabbi Aryeh Kaplan has translated Sefer Yetzirah, the oldest and most mysterious of all kabbalistic texts, and now brings its theoretical, meditative, and magical implications to light. He expounds on the dynamics of the spiritual domain, the worlds of the Sefirot, souls, and angels. When properly understood, Sefer Yetzirah becomes the instruction manual for a very special type of meditation meant to strengthen concentration and to aid the development of telekinetic and telepathic powers.

Extremely informative but not for the simple at heart. You will need to read this book many times as you work your way through the various stages of existence. You will also find a path to walk or a door to open; you may not always enjoy the road but you will always appreciate the journey it takes you on.

There is genius here that makes your brain make connections that transcend common thought. No man could have done this on their own. Kaplan has distilled centuries of commentaries on the Sefer

Yetzirah and added his own discoveries to provide an eminently illuminating book that should be the foundation of all serious students of the kabbalah.

Requires, surely, several re-readings. Not an easy one. But is the way to go to grasp meaning and understanding of Kabbalah.

Above and beyond what I expected. Students of 'Western Qabalah' and Hermeticism *should* read Westcott, but this is truly THE essential version of the Sefer Yetzirah. All the major versions of this great text are included, and Rabbi Kaplan makes great progress toward uniting the discrepancies and uncovering the deeper mysteries of the texts. In addition to literally being a genius, Kaplan explains things in a way that makes them easily understood for anyone with at least a basic background in Qabalah.

Great companion to Essential Kabbalah.
