## Customer Reviews

"Children ages 8 to 12 can keep up with the changes happening all around us with this stellar science reference book. Profusely illustrated and thoroughly 'kid friendly' in organization and presentation, 'Science Encyclopedia' is very highly recommended for family, school and community library collections for young readers. Also very highly recommended is a newly published companion volume by National Geographic Kids, 'How Things Work'" -- Midwest Book Review.

NATIONAL GEOGRAPHIC KIDS inspires young adventurers to explore the world through award-winning magazines, books, website, apps, games, toys, television series and events and is the only kids brand with a world-class scientific organization at its core.

My 7 year old loves this book, he's always telling people the facts he memorizes. it must be well written because he doesn't yawn the entire time he's reading like he does with some other books.

My son loved this book and loved all the new things he learned from reading it

Wow! Wow! Beyond all my expectations

It was Good

My nephew stays up all night reading random facts and telling jokes from the book. He absolutely loves it!

Very good

This book is perfect! Bought for my 8 year old and he loves to read all the interesting things this book has to offer! Definitely a good purchase!

My boys love this book! Full of information and facts
