Best Sellers Rank: #698,521 in Books (See Top 100 in Books) #134 in [Books > Business & Money > Insurance > Business](#)

## Customer Reviews

This book is a must for every homeowner to know. 90% of the information in this book is related toward real property as a home owner. I bought this book because I was in an auto accident and I still learned a lot about just how corrupt the insurance industry really is. I employed some of these terms in my car accidents and the claims adjuster lost control over my claim. However, they still would not pay for replacement cost because their ACV figures are extremely biased due to having a vested interest in the policy. This book reveals needed information if you ever have a claim against any insurance company. Considering the cost of this book and it is written in language anyone can understand, it is a valuable asset to have available.

I recently had a car damaged in a storm and read this book to help me know what my options were in dealing with my insurance company. Don't think that just by paying your premiums on time they are just going to hand you cash when their claim rep totals your car out. I had to fight for mine and was only 80% satisfied at the outcome.. Insurance seems like a scam to me because it's not cut and dried, even though I had full coverage on my car, I don't think I was treated as fairly as I could have been. While it wasn't pretty this book gave me options that the claim rep didn't and had I not read this book I would have just taken what they offered. On any claim you need to check with you state

about what rules they have for insurers. I would recommend anyone dealing with an insurance claim read this book.

Written in a very conversational way, this is a fast read, filled with basic information. While the author seems like a nice enough chap, I was a little surprised that his editors didn't pick up on some pretty sexist language and proud pro-gun opinions -- not expected or necessary in a book about insurance claims in 2016. That said, take the polemic pieces out and you've got a nice little book that'll teach you quickly about insurance claims. If it weren't for the unnecessary stuff this would have been a 5.

This book was recommended a year after my house fire. I inhaled it! Mr. Longcore's advice is superb. My insurance company gave me only rudimentary information. Mr. Longcore filled in the blanks. I followed all his advice, even called him a couple times. My insurance company expected me to settle within the first few months. Boy, were they surprised when I kept sending inventories and took the full two years to settle my claim. This book enabled me to settle for a much larger amount.

It was a really good informative read but the relevance of information is called into question. Also I feel many topics could have been substantiated further. For example the 3x specials rules from what I know is from the 80's and no one goes by that anymore. Also his website is down so many of the promised content that wasn't in the book and supposed to be on the site isn't accessible.

Very informative and eye opener.

Get out your highlighter! This was an exceptional book which guided me through the nightmare of a commercial fire loss, saving me thousands of dollars. The information would also be a must-read for personal loss as well. Do yourself a favor and buy this book before you suffer a loss.

I'm in the industry and I know what this book covers is good information. Everyone with a large claim should know this stuff.
