DAVID L. PEARSON is a Research Professor in the Department of Biology at Arizona State University. His research is concentrated on ecological interactions among communities of species. He has studied habitats from desert grasslands and coral atolls to tropical rainforests and has written more than 75 scientific articles. Having conducted ecological research in Brazil, Peru and Ecuador intermittently during the past 30 years, he has become involved with environmental education and ecotourism in the region and is co-author of *The New Key to Ecuador and the Galápagos*, a tourist's guide to hotels, restaurants, and places of natural interest; *Ecuador and Its Galápagos Islands: The Ecotravellers' Wildlife Guide*; and of *Peru: The Ecotravellers' Wildlife Guide*. LES BELETSKY is a professional wildlife biologist and university zoology teacher. Prior to taking up writing wildlife guides, he conducted many years of field research into the ecology and behavior of birds, along the way writing many scientific reports and several books.

I recently went to both and Pantanal. My tour guide had this book and I found it very useful so I bought a copy for myself. While we were cruising on Rio Negro, whenever we saw some animals (insects, birds, monkeys, caimans), I would check this book to find detail information about the animal. When we were in Pantanal, I missed this book since there were so many different birds I would like to learn about. I wish I had this book before I went on the trip in Brazil! I could have paid more attention to the plants and flowers I saw there. I think this book would make trips to and Pantanal more interesting and educational.

We will be visiting the Pantanal for the first time this June. These books give us a great idea of what and where we might see wildlife

A dictionary of the birds and animals in the . Good color photos.

Good wildlife entries

Excellent beginner guide!

Maybe a little too heavy and big to bring on a trip, but a lot of info. Like the paintings and that it has a little bit of everything in it, plants, insects, birds and mammals.

The book has a lot of good wildlife information for visiting the Brazilian but is missing about 10 pages between the end of the birds and the primates.

Excellent pictures and background information. Will help us enjoy our trip.
