"Animal communication is nothing new or controversial," Gurney writes. "The question is not 'When did we begin to be able to communicate with other species?' but 'When did we stop?'" Of the many new books on interspecies communication, Gurney's is one of the most down-to-earth and thorough. Based on her HeartTalk Program through which Gurney has worked with 6,000 people seeking better communication with their "animal companions" (a term favored by animal communicators as more egalitarian than "pet") her book offers clear steps for reaching animals and will enhance readers' understanding of the creatures in their lives. Gurney also discusses how to choose an appropriate animal companion, how to prepare for his or her death (one of the most tender sections is a list of 18 ways to commemorate deceased pets) and how to ground and center oneself in preparation for communicating with an animal. Written in a smooth, cheery and encouraging tone she's partial to exclamation points and statements like "If I could do it, anyone can!" Gurney's descriptions of her own successful communication with dogs, horses and cats will convince those sympathetic to her message. Yet some of Gurney's advice may test even her most credulous readers: her exercises with animals who have died and with missing animals, for example, may raise some eyebrows. But for the most part, this book is helpful and enthralling. B&w photos. Agent, Jody Rein. (Aug. 14) Forecast: Though some will be put off by Gurney's occasionally corny sentimentality, many pet owners will welcome this book. Enthusiastic blurbs from vets (and more randomly, actress Linda Gray) should help sales. Copyright 2001 Cahners Business Information, Inc.

“I took a workshop with Carol Gurney many years ago, and it

totally turned around how I relate to animals. In this wonderful, warm book Carol will teach you the skills of communication with animals, and you will be forever grateful. — Louise L. Hay, author of *You Can Heal Your Life*

“The Language of Animals offers us great possibilities in deepening our connections with our kindred spirits. Carol’s program can help us get in touch with levels of connection beyond our normal recognition. — Allen M. Schoen, D.V.M., MS, author of *Kindred Spirits*, and Director of Veterinary Institute for Therapeutic Alternatives (VITA)

“Carol Gurney can really express herself when it comes to teaching the art of communicating with animals. And believe me, it works! Carol’s HeartTalk ProgramSM goes beyond talking with animals. It is a marvelous way to expand our relationships with the animals in our lives. — Arthur Myers, author of *Communicating with Animals*

I learned so much from this book. And the techniques Carol offers here really do work!! I communicated with my cat (using distance Reiki and communication). My cat showed me that her jaw was bothering her. I took her to the vet, and that bottom molar had to be extracted!! I was so impressed with Carol’s generous and gentle training, that I ordered the audio (*The Beginner’s Guide to Animal Communication*). THEN I took a remote/online class with Carol. Great stuff! The other day I was picking up a sick cat at the vet’s office (I work at an animal shelter) and when I went over to hold the cat, I got dizzy and almost fell on the table! The cat is DIZZY! Someone fed the poor guy POT, and he was desperately ill. He still has some lingering effects from it. I picked up on his dizziness. Animal communication works!

I am aligned with Carol’s desire to change the way humans relate to animals and this book is a great start for everyone who lives with an animal or just loves animals and wants to be in a deeper relationship with the non-human beings that share this planet. SavingWild.com

Very wonderful book. I enjoyed reading it so much I am looking for another book to be very similar. I enjoyed the easy read with the stories to follow each experience. I would highly recommend this book if you are trying to understand the ways to communicate with animals or at least trying to understand them. I am far away from being able to do this wonderful talent but will continue to read and practice what I have read and learned with this book.

I am still reading it but I can assure it’s incredible to see how many possibility our brain has that we don’t know anything about and for all the animal lovers how wonderfully we can communicate with

them. It's like a new world appearing in front of your eyes. Of course you have to believe to this possibility and practice the exercise that the author suggests you with patience and stability. It is a well written and easy to understand book but sooo interesting. Read it and you will not be disappointed.

I consider this a basic textbook for any serious animal communicator. I recommend reading it at a slow easy pace with occasional breaks of several days because there is a huge amount of detailed information to absorb. Getting through the book should always be a pleasure and not a tedious chore.

Has some great information for living with "pets." Several of her exercises use a human partner so beginners can verify experiences and build confidence in their abilities.

This book offers tools and examples of animal communication that will teach and inspire you. It affirmed many of the experiences I have encountered and provided instruction as to how communication may be improved. I could not put it down! I enjoyed it so much that I plan to order the print version, though I downloaded and read the digital version. Thank you for a great resource.

When I started to read the book I thought "we should be two doing this together". I have tried out one of the lessons on my stallion and I was amazed because it worked!! I have just bought a dog who has not leared any ques. I tried it out on him, and it worked there too! When I started to read the book, I didn't think it was so easy to communicate with animals. I felt I had to consenstrate very hard, but it was worth it. Easy to read and the author was good at explaining. I recommend this book to anyone who would like to take their love to their animals a little bit further and deeper and then you will really meet your sole mate.
