Chemistry & Chemical Reactivity

Synopsis

Succeed in chemistry with the clear explanations, problem-solving strategies, and dynamic study tools of CHEMISTRY & CHEMICAL REACTIVITY, 9e. Combining thorough instruction with the powerful multimedia tools you need to develop a deeper understanding of general chemistry concepts, the text emphasizes the visual nature of chemistry, illustrating the close interrelationship of the macroscopic, symbolic, and particulate levels of chemistry. The art program illustrates each of these levels in engaging detail--and is fully integrated with key media components. In addition access to OWLv2 may be purchased separately or at a special price if packaged with this text. OWLv2 is an online homework and tutorial system that helps you maximize your study time and improve your success in the course. OWLv2 includes an interactive eBook, as well as hundreds of guided simulations, animations, and video clips.

Book Information

Hardcover: 1408 pages

Publisher: Brooks Cole; 9 edition (January 27, 2014)

Language: English

ISBN-10: 1133949649

ISBN-13: 978-1133949640

Product Dimensions: 8.8 x 1.8 x 10.9 inches

Shipping Weight: 6.3 pounds (View shipping rates and policies)

Average Customer Review: 4.2 out of 5 stars 22 customer reviews

Best Sellers Rank: #7,547 in Books (See Top 100 in Books) #50 in Books > Science & Math > Chemistry > General & Reference #65 in Books > Textbooks > Science & Mathematics > Chemistry

chemistry to every day. Cases show you where chemistry has been used to solve a problem or where chemistry is important in every day. Examples include the use of isotopes to catch athletes who cheat using illegal drugs, acrylamide in French fries, and the amount of salt in seawater.

Connecting lecture topics + lab work. End-of-chapter questions address techniques used and work performed in the general chemistry laboratory to help you make the connection between lecture topics and lab work. Problem-solving tips offer help. The authors anticipate potential trouble

spots and provide tools designed to help you through. Problem-Solving Tips offer help to you in determining how to approach and solve problems. Study guide ensures you're ready for the exam. The study guide includes chapter overviews, key terms and definitions, sample tests, expanded commentary and study tips, worked-out examples, and direct references back to the text.

OWLv2 Is the Leading Online Learning System for Chemistry, Improving Learning Outcomes

[View larger](#) [View larger](#) [View larger](#) [View larger](#) Your ticket to better chemistry grades. OWLv2 is a proven system to help you succeed. Its Mastery Learning approach allows you to practice at your own pace, receive meaningful feedback and use learning resources to help you achieve better grades. Know what's important. OWLv2 concentrates on what's most important—understanding chemistry concepts—and its technology lets you work the way that's best for you. Discover the relevance of your lessons. Interactive simulations, visualizations, and tutorials integrated smoothly into your lessons. The more you learn, the better prepared you are to solve problems and analyze information which helps you succeed in exams and in the workplace. Master the content. Problems challenge you to think about the concepts, and OWLv2 lets you practice what you've learned.

John C. Kotz is an emeritus State University of New York Distinguished Teaching Professor at the College at Oneonta. Educated at Washington and Lee University and Cornell University, he held National Institutes of Health postdoctoral appointments at the University of Manchester Institute for Science and Technology in England and at Indiana University. Professor Kotz has co-authored three textbooks in several editions - INORGANIC CHEMISTRY, CHEMISTRY & CHEMICAL REACTIVITY, and THE CHEMICAL WORLD - along with the INTERACTIVE GENERAL CHEMISTRY CD-ROM. He also has published research on inorganic chemistry and electrochemistry. He was a Fulbright Lecturer and Research Scholar in Portugal in 1979 and a visiting professor there in 1992, as well as a visiting professor at the Institute for Chemical Education (University of Wisconsin, 1991-1992), at Auckland University in New Zealand (1999), and at Northwest University in South Africa (2006). He has been an invited speaker on education at conferences in Brazil, Argentina, South Africa, and New Zealand. He was recently a mentor for the U.S. Chemistry Olympiad Team. Professor Kotz has received several honors, among them a State University of New York Chancellor's Award (1979), a National Catalyst Award for Excellence in Teaching (1992), the Estee Lectureship in Chemical Education at the University of South Dakota (1998), the Visiting Scientist Award from the Western Connecticut Section of the American

Chemical Society (1999), and the first annual Distinguished Education Award from the Binghamton (New York) Section of the American Chemical Society (2001). His email address is johnkotz@mac.com. Paul M. Treichel, received his B.S. degree from the University of Wisconsin in 1958 and a Ph.D. from Harvard University in 1962. After a year of postdoctoral study in London, he assumed a faculty position at the University of Wisconsin-Madison. He served as department chair from 1986 through 1995, He was awarded a Helfaer Professorship in 1996 and a departmental excellence in teaching award in 2006. He has held visiting faculty positions in South Africa (1975) and in Japan (1995). Retiring after 44 years as a faculty member in 2007, he is currently Emeritus Professor of Chemistry. During his faculty career he taught courses in general chemistry, inorganic chemistry, organometallic chemistry, and scientific ethics. Professor Treichel's research in organometallic and metal cluster chemistry and in mass spectrometry, aided by 75 graduate and undergraduate students, has led to more than 170 papers in scientific journals. He may be contacted by email at treichel paul@me.com. John R. Townsend, Professor of Chemistry at West Chester University of Pennsylvania, completed his B.A. in Chemistry as well as the Approved Program for Teacher Certification at the University of Delaware. After a career teaching high school science and mathematics, he earned his M.S. and Ph.D. in biophysical chemistry at Cornell University, where he also received the DuPont Teaching Award for his work as a teaching assistant. After teaching at Bloomsburg University as a temporary instructor for two years, he joined the faculty at West Chester University, where he has taught courses in general chemistry, biochemistry, and the history of chemistry. He coordinates the chemistry education program for prospective high school teachers and the general chemistry lecture program for science majors. He has been the university supervisor for more than 70 prospective high school chemistry teachers during their student teaching semester. His research interests are in the fields of chemical education and biochemistry. He may be contacted by email at jtownsend@wcupa.edu. David A. Treichel, Professor of Chemistry at Nebraska Wesleyan University, received a B.A. degree from Carleton College. He earned a M.S. and a Ph.D. in analytical chemistry at Northwestern University. After post-doctoral research at the University of Texas in Austin, he joined the faculty at Nebraska Wesleyan University. He teaches courses in general chemistry, analytical chemistry and instrumental analysis. His research interests are in the fields of electroanalytical chemistry and surface-laser spectroscopy. He may be contacted by email at dat@nebrwesleyan.edu.

So far this book is very informative, but do yourself a favor and splurge on the hard cover or the paper back. There are a few millimeters of paper between the hole and the edge of the paper, and it

tears SO EASILY. I wish I could send it back for the hard cover version

This book arrived in a timely manner and my son is very happy with the lay out and that the book is new with no highlights or marks.

Shipped extremely promptly. I love the looseleaf option as it so much cheaper. Some people don't like to put their looseleaf in binders because it can tear the pages, but if you go to Lowe's you can buy something called a "Binding Post" (aluminum fawners) to prevent teaching. You will need to buy three of them for each hole punch and they cost ~\$1 each. Make sure you buy the 2" binding posts because then that will fit the entire book. Keeps your book in great condition without tearing pages, and it allows for easy reading as if it were bound together.

very good & informative. just what i needed for class

Great condition. Very pleased

Perfect product and fast shipping.

Perfect condition

It was the book as stated, and for a reasonable price.
