Wound Care At End Of Life: A Guide For Hospice Professionals

Synopsis

Quality wound care in hospice is a challenge. As patients decline, advanced disease can compromise the body's largest organ – the skin. Good wound care is essential to promoting comfort and dignity; yet with limited studies devoted to skin conditions at end of life, evidence-based guidelines specific to wound care are limited. This book provides guidance for the assessment and palliative management of wounds. Many factors influence whether healing a wound is a realistic goal. Whether the goal is for healing or for symptom relief, untreated wounds can lead to physical discomfort and impair quality of life. It is necessary that they receive appropriate intervention.

www.hospiscript.com IAHPC Book Review: “This is my sort of manual. It's short, clear, and well set-out with algorithms and treatment tables – even a physician can understand it. It starts with the BUILD program, which looks like a bit of classic palliative care. Build trust and respect with patient and family; Understand how wound impacts on them; Information about wound care and outcomes; Listen to the patient; and Develop a plan with the patient. | This book would be useful to the experienced professional as a quick treatment lookup tool, and as a learning guide for those less experienced.”

Great resource when used by experienced clinician. Small enough to take in bag on visits to come up with holistic plan of care at the end of life.

Easy reading, very good reference. I had deal with these patients for 30 years and I had not read a source so nicely written about these patients. You must had and read it, I was so impressed, of the information, and the way is was done, that I read easily in a weekend, and I do not like to read a lot.

Excellent resource. Very few books on wound care at end of life. Highly recommend.

An essential reference that I carry with me in my bag at all times as a hospice nurse. Wounds are a huge part of hospice care, and this is an indispensable reference.

This is a GREAT book with great information! I just wish it were smaller so I could carry it with me more. I find myself leaving in on my desk because it's too large to fit in my bag and not get bent.

Excellent summary of topic!
