Oscar And The Moth: A Book About Light And Dark (Start With Science)

Synopsis

A first science book that introduce young readers to core science concepts through fresh, graphic illustrations, engaging stories, and supplemental activity suggestions. As Oscar the kitten watches the sun set one evening, he has lots of questions about light and dark. Who better than Moth to help out? Moth shows how sources of light are as different as the sun, stars, fireflies, streetlights, and airplanes, and also explains how shadows are made and why darkness comes at night. Includes lesson summaries!

Book Information

Series: Start with Science

Paperback: 32 pages

Publisher: Candlewick; Reprint edition (September 23, 2008)

Language: English

ISBN-10: 076364031X

ISBN-13: 978-0763640316

Product Dimensions: 7.1 x 0.2 x 10.2 inches

Shipping Weight: 4.2 ounces (View shipping rates and policies)

Average Customer Review: 4.9 out of 5 stars 12 customer reviews

Best Sellers Rank: #186,140 in Books (See Top 100 in Books) #90 in [Books > Children's Books > Education & Reference > Science Studies > Physics](#) #620 in [Books > Children's Books > Animals > Cats](#) #1298 in [Books > Children's Books > Education & Reference > Science Studies > Nature](#)

Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

Geoff Waring has worked as a graphic designer and is the author-illustrator of BLACK MEETS WHITE. He says that the Oscar books are based on his own cat, Oskar. He lives in London.

I'm a big fan of the Oscar the cat series by Geoff Waring. They all have lovely illustrations and make science topics accessible for young children. I would estimate an appropriate age range to be two(ish) to five years old. Here is a summary of the books I have from the series: 1) Oscar and the Bird (Electricity) - Impressive in its ability to make technical concepts accessible to young children. Doesn't get down to the level of electrons and charge, but does discuss batteries, basic concept of

a circuit, different forms of electricity. Helped my youngster understand that electricity can be dangerous and you shouldn't play with it (via discussion of a power line).2) Oscar and the Moth (Light/Dark) - Not super technical, but discusses concepts such as different sources of light, how lights can be warm, rotation of the earth, shadows, how some animals make lights with their bodies (ie: bio-luminescence).3) Oscar and the Frog (Growing) - Very nicely done. Concepts such as: different animals/plants grow in different ways (from eggs, from seeds, live births); different living things grow at different rates, animals eat different types of food to grow.4) Oscar and the Bat (Sound) - probably the least science heavy of the four Oscar books I own. Nice that it talks about how animals can use different parts of their bodies to make sound. Nice that it discusses that sounds get louder the closer they get. Doesn't go into concepts about how sounds are made or propagated (ie: sound waves). This is not necessarily a complaint, I'm not sure I could get a three year old to understand a sound wave either!

Great book

Very cute book for young children.

This book was simple, but very informative for my Universal Pre-Kindergarten students. They loved the characters and learned so much

We bought this for our homeschool unit on light and shadow. It was a great story, good information and a fun format

Beautiful illustrations, well written for children, my preschoolers loved this book!

Kids love it!

Great storyline. Captured kids attention and was still educational.
