## Customer Reviews

"A must-read for anyone who goes outdoors. Informative and captivating. It covers the principles of survival better than any book I have read." --Capt. Scott O'Grady, Survivor--Bosnia

Greg Davenport, a former USAF Survival, Evasion, Resistance, and Escape Specialist, is considered one of the best survival experts in the world. For over 30 years, he has had students from around the world, with a myriad of backgrounds, follow him into the mountains and deserts to learn both basic and advanced wilderness skills. Davenport is a well known motivational speaker addressing survival related skills such as stress abatement, leadership, and teamwork. In addition, he has consulted or appeared on ABC, NBC, CBS, BBC, FOX, MSNBC, CNN, HNN OLN, and many others in his role as a survival expert. Davenport has a Doctor of Health Science degree with an emphasis in Leadership and Organizational Behavior and a Master's

Degree in Physician Assistant Studies focused on Wilderness and Emergency Medicine. He is a proud husband and father of seven adorable children ranging in age from 28 to 2.

I've had this product for a couple of weeks. Read it all through and through. The illustrations are easy to comprehend. The way it is written is also simple and detailed. For anyone that is looking for the perfect book in wilderness survival this is it. It would have been nice though to get just a little more of a preview of each section before I purchased it just so I know what I was getting myself into. This is my third survival book that I've gotten off of .com and this is the only one that is as detailed and thorough on wilderness survival. In the book I like the fact that the author gives you man-made solutions and mother nature solutions. Overall I was pleased with my purchase. I would also check out the Encyclopedia of Wild Edible Plants of North America, I haven't received it yet but from the preview it seems like a thorough book.

When building a library for on the move camping/survival, do not forget this resource. Excellent coverage on "how to's" planning, building and sustaining shelters and finding resources to survive. Pack able size, to refer often to things you should know but often forget. Great illustrations on shelters and traps. Some guidance on edible plant ID yet I would recommend additional resource on that. Excellent go to manual.

It is great! Lots and lots of good information.

Got as a present. My brother liked it

This book, in my opinion, covers just about every basic thing a person needs to know about Wilderness Survival. The information in this book will keep you alive long enough to be found or rescued. A great starter and a must for any Survivalist's or Prepper's Library.

The tone of this book is great - no bragging, no grandstanding. Good information that covers not only practical skills but also useful commentary on the psychological aspects of a survival situation. Covers many climates so it's relevant to most anyone.

ok

Great book
