Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

Love it!

very helpful for beginners Teaching kids ... and learning more

Good field guide. Great to put in your backpack and use for quick reference.

Good Info

love it, love it

wish there were more items listed

While this is very basic and brief, I took it with me on a field trip. It was so light and convenient to grab and helpful. I have numerous Pocket Naturalist Guides and they're fine for what they're intended for - a quick accessible reference.

Great guide informative can't wait for better weather to put it to much better use in identification and more geology
