Christopher M. Doran MD is a Psychiatrist and a Clinical Associate Professor at the University of Colorado School of Medicine, USA. He has taught the principles and practice of psychotropic

medication prescription around the globe to practitioners of all disciplines.

Finally, I found it! This is one of those rare "real-life" cookbooks to medicine. Read it ... and you are ready to see'em all.

I am a psychiatric nurse practitioner student and I find this book very helpful in my clinical rotation. I especially like the clinical tips and talking points. It is definitely worth it. It makes medication management less intimidating.

Great read. Very helpful. Essential for practice. The book was enjoyable and quick and to the point with pertinent information.

Very detailed book. Worth keeping in one's personal library for future reference.

unbelievably clear and understandable in his writing - I feel like he is talking to me as a preceptor (I am currently in a PMHNP program). Thank you, Christopher!

Required text for a class. Well written, easily understandable for the given topic.

This book is easy to read and has a lot of good info about many different issues that may arise in dealing with a patient who needs mental health medications. Some of the info is known to a good provider but it also serves as a good reminder and it includes some sample appropriate conversation to use when dealing with patients - even difficult patients.

Fantastic book with lots of great information
