Great tool to help prepare for the arrt exam. I was pleasantly surprised by how well I did. (Over 90%) I'd suggest doing ten or so cards then repeat them to make sure you remember them then another ten and repeat. I used these, Lange review book, mosby review book and Giordano review book. I did find errors on a few cards. Positioning for rpo/lpo si joints and taylor method of pelvic outlet are incorrect. Those are the only ones i really noticed and all review materials have errors. Worth the money. Good luck!

I loved using these cards to help me prepare for the ARRT registry. I found a few mistakes throughout the cards, but nothing that you wouldn't catch anyway. They are well worth the money and helped me pass on the first try. I highly recommend these!!

I really found this helpful when studying for my exams! (:

Helpful

I bought these thinking that I would use them during down time in clinic to study. The cards were too big to fit in my scrub pockets. I didn't end up using them at all. I would recommend sticking with the Lange QA book and use RadReviewEasy online to study for ARRT. I just passed my test the other day and got a 98.

I was surprised by the amount of material these flash cards cover. The box as a whole weighs as much as a brick. I'm happy with the purchase and I've already started studying for the registry I'm taking in December.

I would really recommend....and makes it even better if you can use rad review easy to test on random questions after reviewing note cards to see what you really know

They have been a great study tool for me. If you are taking the ARRT exam, start studying these early and you will do fine. Very comprehensive
