Design & Construction

Customer Reviews

Sam A. A. Kubba, Ph.D., is an award-winning architect with more than 30 years of experience in all aspects of construction. His practice includes outstanding projects in the United States, the United Kingdom, and the Middle East. He is currently a consultant for the United Nations Office for Project Services. Dr. Kubba's books include Mesopotamian Furniture and McGraw-Hill's Space Planning for Commercial and Residential Interiors, Architectural Forensics

great service and good general knowledge book.

It worked...

This book is a must for any estimator or others that need to understand plans! Mr kubba gives you a nice variety of various types of prints!

I am very new to architecture, frankly I use it to build model houses, but I thought it time for me to move forward and to start studying the application that I do to actual homes. This book is extremely good for beginner to intermediate level folks delving into Blue print reading

bought as a gift ,great read

Great book!

Thanks!!!

so far its going pretty well from the reading, I like the outline of the book its clear and concise. first 2 chapters may spend a little time on what blue printing is made on what types of paper and other cad related issues but from chapter 3 on out about lines dimensions and truly understanding how to read blue prints, I recommend this book. not fully finished so I will be giving a closing review.
