Praise for Allen C. Bowling's *Complementary and Alternative Medicine and Multiple Sclerosis*: "This book is full of wise and balanced information. It provides a valuable service to patient and health care provider alike."--Dr. Oliver Sacks, author of *Awakenings* "Rarely does a publication address an

unmet need as thoroughly as *Alternative Medicine and Multiple Sclerosis*... Dr. Allen Bowling is uniquely qualified to produce a book on CAM, having a doctorate in pharmacology and clinical experience as a neurologist treating people with MS. Organized in a user-friendly format, the topics are grouped in logical categories. In addition, references are provided, encouraging further exploration. Highly recommended for people with MS, their families, and their health-care providers." -- InsideMS "Alternative Medicine and Multiple Sclerosis is a much-needed resource. Dr. Bowling has done an excellent job of making his reader more aware of the myriad forms of non-traditional therapies available." -- Consortium of Multiple Sclerosis Centers "In Dr. Allen Bowling's *Alternative Medicine and Multiple Sclerosis*, he enables the reader to find unconventional options that may provide symptomatic relief when conventional therapies for multiple sclerosis are limited or otherwise unsatisfactory. Dr. Bowling explains the potentially dangerous interactions between complementary and alternative (CAM) therapies and medical treatments utilized in the management of MS; identifies CAM therapies that are possibly effective, low risk, and inexpensive; and exposes ineffective, dangerous, or needlessly costly alternative therapies. *Alternative Medicine and Multiple Sclerosis* is a very highly recommended and informative addition to any personal or professional multiple sclerosis reading list." --The Bookwatch (2014-03-11)

This is a great book for the professional or the patient seeking knowledge provided they have the base and capacity to understand what they are reading. I saw on the MS Association web site that they have this book in their lending library.

I liked that Bowling evaluates substances and activities and gives an opinion on their usefulness for MS patients. The opinions are backed by studies when available, and I appreciate that I can evaluate other results based on Bowling's standards of evidence of effectiveness and safety.

Easy to browse and dive deep into nearly all of the alternative and complimentary approaches to the joy of managing life with this ever changing devolving disease

My doctor recommended the book, I haven't read it yet. It looks like it's going to be very informative
