# Red With Other Colors (Mixing Colors)

## Synopsis

Where are the great pyramids and the Nile River located? Find out in this title that's all about Egypt. This book takes a visual approach to the study of key periods in world history curriculum. It looks at the period of history through the eyes of a child investigating the aspects of the society that matter to them. The title does not just focus on childhood but looks at all aspects of daily life through the eyes of someone examining the evidence. The book uses enlarged photographs, labeled photos and unusual uses of images to give the books a visual edge. The focus is on photos as evidence rather than the reconstruction artwork that is commonly used, while delivering information that is curriculum relevant and at a level that can be understood by the target audience. --This text refers to an out of print or unavailable edition of this title.

## Customer Reviews

Victoria Parker is a Heinemann Raintree author. --This text refers to an out of print or unavailable edition of this title.

You Are in Ancient Egypt is a pretty good overview of life in Egypt. Instead of the perspective of an adult, this is told as if the reader were a child living among the ancients. There are pictures and illustrations to keep children interested in the pages and the text is in a big font and does not

overwhelm the pages. Written for elementary students, this will give them a knowledge of what children in Egypt did on farms, how they played, where they were educated. There is information about the pyramids and the mummies and the artwork. It is a good intro to ancient Egypt for inquiring little minds.
