Customer Reviews

I guess You get what you pay for (\$2.99) . Full of very general information that could be gleaned in about five minutes of web surfing.

See title. Chunks of the book seemed to be missing from the free prime download. Guess that is why it's free

Nice for if you know nothing, great introduction

Not much of any helpful information. Moving on to read another book to actually learn something that isn't just common sense. Don't waste your time, I think these 5 star reviews are fake btw.

i read this book and it was awful. do not get this book if you are going to buy penny stocks. just look it up online.
