Ok, this is an interesting book for sure. It has one of the best, most lucid descriptions of Quantum reality that I have read. The author knows the subject well and explains it brilliantly. The next section moves on to a description of the Runes and then a couple of spreads for reading them which is all good if you want to use them in a similar way as Tarot. To see the forces and energies that are around you and some of the possibilities that exist at that time. There is a Table of Rune meanings with good descriptions and more importantly a ritual designed for each one. However, there is no connecting thread of instruction what to do with all this information unless you just want to do a Rune reading and read the result. If you do a past, present future reading what purpose are the rituals? That is not explained anywhere that I could see and to be honest that is where the book falls down and is imo the most powerful part of the process. The best tool unexplained! practice magick and as such I am interested in results/change that are manifested including both middle world (the physical plane) and spiritual/internal alchemy. I want to actively co-create my future. If you understand evocation and invocation and the quantum material at the start of this book and THEN use the rituals of the particular Rune(s) that you want to work with to achieve a desired result you have a great new tool set. Warning, As the author states these Runes on their own are symbols but the powers and forces they represent are incredibly powerful and if you do use them, treat them with respect and love and use your inner guidance which ones to use and when. If you seek power over others you will enslave yourself. Be humble and walk with the gods. Overall a good read for the Quantum worldview and good Rune descriptions and rituals. If you can use those then it's worth it. If you are a total beginner to all this and need lots of guidance to connect the dots then probably not the best book for you imo.

interesting

This was a great how-to manual of crafting runes-with-a-purpose. I hadn't ever heard or read such a powerful description or plan for runes. One could easily adopt it for sigils, too. Any cons? Some of the rune descriptions don't specifically match up with many resources I own, so read them with care.

I've worked with runes a long time they are bar none the best magical amulets I have ever used this book will put a fresh perspective on them and a different explanation for how they work.

This is a very interesting read.

If you want some info on how to more effectively use the Law of Attraction, this book may help some. If you're interested in anything to do with the Runes - forget it. He not only doesn't know the meanings - or as I prefer to refer to it, the energies of the Runes, he doesn't even know what they ARE, let alone how to use them.

I personally know the author, and what he says is right on the money. So if you want to change your life, and create it to be the way you want it to be, then take action and read Lees' book. It will help you. Lee is an honest, caring, hard working individual who lives life on his terms. Now you can too. IF you take action.

Great cover and title, yet did not impress me at all. I was expecting a lot more. Waste of money.
