Dr. Richard Elwes is a writer, teacher and researcher in Mathematics and a Visiting Fellow at the University of Leeds. He contributes to New Scientist and Plus Magazine and publishes research on model theory. Dr. Elwes is a committed popularizer of mathematics which he regularly promotes at public lectures and on radio.

The author has a real gift for conveying mathematical concepts in a concise, easy-to-understand way. I had vague memories of high school math which never failed to fill me with dread. Now I feel

confident with fractions, algebraic equations and basic trigonometry (I got sin, cos and tan - remember them? - in one page). A great read if you want to brush up on everyday math.
