While this book failed to meet my expectations, it is nevertheless an interesting read. I purchased the book seeking information about the Japanese biological warfare program. What I got was minimal information of the program and a torrent of the atrocities and horrors of the so called "research." While every third-grader knows that the venom of a poisonous snake will kill a fellow if injected into him, what earthly purpose was served by PhD's doing this? Did this really contribute to their knowledge? This sort of crap is detailed and reported by Harris in a scholarly and readable manner.....it's not his fault. The US cover-up will really get the blood to boiling. We sold our soul and

permitted a great many to escape the richly deserved punishment meted out to others during the war crimes trials for the results of such experiments mentioned above. Such a deal! This book is useless as military history. It is, however a good, and readable reinforcement of the concepts of the evil in mankind and the stupidity in our bureaucracies.

This book arrived in splendid condition--the bookseller is much appreciated! What a story here; author Sheldon Harris reveals much about life and death in the Manchuria area from 1932-1945. The book was well researched and what it tells about biologic weapons for mass murders has been well hidden from the general public. An eye opener for those who care to seek the brutal truth.

As expected
